

Em caso das Flood, quantos População podem ser afetados?

Estimated número de pessoas affected per hazard zone

Hazard Zone	Contagem
High	0
Medium	6,500
Low	35,600
Total Exposed	42,100

População	Contagem
afetados	6,500
Não afetados	35,600
Not Exposed	435,000
Displaced	1,300

- **Exposed people:** People who are present in hazard zones and are thereby subject to potential losses. In InaSAFE, people who are exposed are those people who are within the extent of the hazard.
- **Affected people:** People who are affected by a hazardous event. People can be affected directly or indirectly. Affected people may experience short-term or long-term consequences to their lives, livelihoods or health and in the economic, physical, social, cultural and environmental assets. In InaSAFE, people who are killed during the event are also considered affected.
- **Displaced people:** Displaced people are people who, for different reasons and circumstances because of risk or disaster, have to leave their place of residence. In InaSAFE, demographic and minimum needs reports are based on displaced / evacuated people.

Minimum needs

Relief items to be provided once (uma vez)	Total
Toilets (latrinas/casas de banho)	70
Relief items to be provided monthly	Total
Detergent (detergente) [g]	258,000
Relief items to be provided daily (diariamente)	Total
Trash bags (saco de lixo) [100 litre bag]	20
Relief items to be provided monthly (mensalmente)	Total
Soap (sabao) [g]	450,000

Relief items to be provided daily	Total
Xima, sadza [g]	322,000
Relief items to be provided daily (por dia)	Total
Drinking water (agua para beber) [l]	2,000
Relief items to be provided weekly	Total
Relief items to be provided once	Total
Water collecting container [10-20 litre]	260
Saucepan (panela)	260
Plate (prato)	1,300
Mattress (colchao)	1,300
Insecticide bed nets (rede mosquiteira)	1,300
Covered floor area (3.5mx3.5m)	4,500
Infants blanket (100x70cm) - (cobertores)	260

Estimated number of people displaced by age per aggregation area

Age ratio is not found. No calculations produced.

Estimated number of people displaced by gender per aggregation area

Gender ratio is not found. No calculations produced.

Estimated number of people displaced by age vulnerability per aggregation area

Vulnerability ratio is not found. No calculations produced.

Estimated number of people displaced by gender vulnerability per aggregation area

Vulnerability ratio is not found. No calculations produced.

Estimated number of people displaced by disability vulnerability per aggregation area

Vulnerability ratio is not found. No calculations produced.

Estimated number of minimum needs per week

Aggregation Area	Total displaced population	Xima, sadza [g]	Minimum needs breakdown							
			Drinking water (agua para beber) [l]	Soap (sabao) [g]	Detergent (detergente) [g]	Toilets (latrinas/casas de banho)	Trash bags (saco de lixo) [100 litre bag]	Water collecting container [10-20 litre]	Saucepan (panela)	Plate (prato)
Nicoadala	1,300	322,000	2,000	450,000	258,000	70	20	260	260	1,300
Total	1,300	322,000	2,000	450,000	258,000	70	20	260	260	1,300

Analysis notes

- Columns and rows containing only 0 or "No data" values are excluded from the tables.

Notas gerais de exposição da população

- The impacts on roads, people, buildings and other exposure elements may be underestimated if the exposure data are incomplete.
- A população exposta varia de acordo com o horário (dia ou noite, fins de semana, feriados etc.). Essas variações não são incluídas na análise.
- Os números informados para as contagens da população foram arredondados para as 10 pessoas mais próximas, se o total for inferior a 1.000; 100 pessoas mais próximas se forem mais de 1.000 e menos de 100.000; e mais próximo de 1.000 se mais de 100.000.
- O arredondamento é aplicado a todos os valores da população, o que pode causar discrepâncias entre subtotais e totais.
- Note that report rows containing totals are calculated from the entire analysis area totals and then rounded, whereas the subtotal rows are calculated from the aggregation areas and then rounded. Using this approach we avoid adding already rounded numbers and in so doing compounding the rounding.
- Se as contagens de deslocamento forem 0, nenhuma necessidade mínima e pós-processadores relacionados serão mostrados.

Flood general notes

- A extensão e a gravidade do cenário mapeado ou das zonas de risco podem não ser consistentes com eventos futuros
- Os impactos em estradas, pessoas, edifícios e outros elementos de exposição podem diferir dos resultados da análise devido a condições locais, como terreno e tipo de infra-estrutura.
- The analysis extent is limited to the extent of the aggregation layer or analysis extent. Hazard and exposure data outside the analysis extent are not included in the impact layer, impact map or impact reports.

Affected notes

- Exposures in the following hazard classes are considered affected: High, Medium

Displacement rates notes

- For this analysis, the following displacement rates were used: High - 100%, Medium - 20%, Low - 0%
